Car Giant are a [used BMW dealer in London](#) , but also sell other makes and models. I think they used to call themselves car trade sales London but then changed their name. They have lots of BMW available to browse at one giant location on Hythe Road. However, they do not solely specialise in BMW, unlike Big Motoring World in West Malling, Kent. This used car dealer has over 500 used BMW all at their single site. If you have your heart set on this German manufactured vehicle then this garage is a must for any BMW enthusiast. Whatever the model or engine size you are after, they will find it.
